Example with of call/cc

Selection

Algol 60: if ... then ... else

- **select** -> if **condition** then **statement** else **statement**
- Some langs use : elseif or **elif**
- keyword to test multiple conditions

```
if a==b then
  #statement1
elsif a==c then
  #statement2
elsif a==d then
  #statement3
else
  #statement4
end
```
